1. What is The Purpose

This user guide is part 2 of 2 parts Program Enrollment. The steps outline in this user guide is intended for center director to enroll or “Add New Program” for a child which will assign a child schedule and setup recurring billing for that child.

Note: This user guide assumes that Program Enrollment Setup (Part 1) is done already for your center, typically with the help from the OnCare implementation team. For more information about Program Enrollment Setup, please refer to the separate “**Program Enrollment Setup user guide.**”

2. Setup a Child for Program Enrollment Recurring Billing

Under the OnCare Program Enrollment flow, there are 3 ways you can manage your enrollment in OnCare as shown below:

This user guide covers **method one** which is to enroll a child whose record is already added in the system by the center director.

To learn more about method 2 and 3, please refer to Program Enrollment Setup user guide.

By add a new program to a child, the system will assign a child schedule and setup recurring billing for that child.

To setup a child for Program Enrollment Recurring Billing, click on “Program & Billing” and then click on “Add New Program” as shown below:

5. How to handle Program Billing for a Subsidized Child

You need to add a program to a subsidized child like a regular child as described above.

The system defaults the Sponsor ledger for the entire billing amount associated with the selected program. Once the program has been added, you can edit the ledger and the billing amount accordingly.

Child Program & Schedule Add New Program

Child Program

Program Name	Days Offered	Start Date	End Date	Action
